The Leader in Protective Services

Contact us to learn more about The Six Pillars of Protective Services and identify how Securitas can best serve your needs. Partner with The Leader in Protective Services to take advantage of security professionals who will learn your security objectives and can recommend the service and technology mix to provide the protection you need today and anticipate your requirements going forward.
On-site Guarding
Securitas security officers are the foundation of our organization. Officers are screened and trained to help enable them to convey a high degree of professionalism in their mission of helping safeguard people, property and information. We hold our officers to a high standard and expect them to execute their duties while upholding our core values of integrity, vigilance and helpfulness.

Mobile Guarding
Preventative patrol inspections are a proactive deterrent to theft, vandalism and other unlawful acts. Using clearly marked Securitas vehicles, our Mobile security officers can respond to alarms, escort employees, and open and close business premises. Our officers can be dispatched remotely, or operate at predetermined as well as random times from locations miles apart. For added assurance, Securitas Mobile Guarding provides clients real-time, web-based reporting of patrol inspections.

Remote Guarding
Remote Guarding solutions are real-time security programs that offer an intelligent way to supplement on-site security requirements. Remote Guarding services can be proactive, reactive or interactive, depending on the requirement they are intended to address. Common Remote Guarding services include: alarm verification, remote patrol, remote entry/exit management, remote employee escort and remote perimeter protection. The combination of smart technology and our security expertise creates unprecedented efficiency to help protect your facility 24/7.

Electronic Security
Securitas is uniquely positioned to offer electronic security solutions directly through Securitas Electronic Security or integrated with your guarding program. Securitas Electronic Security is a full service electronic security company, providing access control, intrusion and surveillance systems, capable of supporting or integrating services for every Securitas client. Our comprehensive approach to Integrated Guarding assesses all aspects of client facilities in order to help design a program that meets their security requirements thoroughly and efficiently and can provide a single point of contact for design, installation and service. Securitas is a service company and we can provide consultation and service programs for our systems or those already installed by another provider.

Fire & Safety
Securitas has a long history of providing fire and safety related services to our clients. These specialized services include EMT, Fire and Life Safety consulting, fire brigade and fire equipment inspection services. Often, these services are provided in conjunction with other Securitas services, but they can be provided directly.

Corporate Risk Management
Through Pinkerton, a related company, clients have access to Pinkerton’s rich tradition of service excellence, which has made it the leading corporate risk management company in the world. Pinkerton provides a uniquely holistic approach to risk management that helps protect and create value for clients. As your trusted risk advisor, Pinkerton focuses on mitigating risk through a full range of services and solutions that address threats across all operational and strategic areas of an organization on a global basis. Pinkerton’s specialized offerings range from investigative services and employment screening to executive protection, crisis management, brand protection, risk profile analysis, security management and business intelligence services.

Six Pillars to Support Your Organization
Whether you require permanently scheduled or temporary service from one or more pillars, our security professionals will consult with you to understand your unique security requirements and goals. After a detailed Operational Risk Analysis, our experts will recommend the mix of security services that best addresses those requirements.

After service initiation, our proprietary tools help our clients stay connected to their facilities. Through the use of SecuritasVision, our officers’ activities are well-documented and consistently reported. In addition to tour data, SecuritasVision can also help clients assess dynamic security requirements through its rich analytics capabilities. Our SecuritasConnect portal allows clients web-based, 24/7 access to real-time as well as historical information and reporting.
