

## Remote Entry/Exit Management

### **Efficient and effective way to proactively protect your people, premises and assets**

With Remote Entry/Exit Management, we can verify that entry points are opened only for authorized activity. In compliance with existing access control protocols, we can verify the identity of individuals requesting access, confirm authorization, track and record activity, and report any exceptions.

Whether you have sporadic activity during slow hours, are looking to streamline and have better records of your entry processes, or need to fill in gaps during officer breaks, Remote Entry/Exit Management can address those needs.

Securitas works with our clients to determine the appropriate procedures - what can be automated and what needs to be recorded - to realize notable efficiencies.

## Advantages of Entry/Exit Management

- Provides on-demand processing of individuals requesting access to your facility
- Maintains the security of your facility's entry points and appropriately documents employees, visitors and contractors as they enter or leave
- Each request is handled uniformly, creating meaningful data that can be used to track personnel activity
- Enhances the productivity of your security program
- Part of a comprehensive Protective Services portfolio

## How Entry/Exit Management Works

- Expert consultative design optimizes service delivery
- Video surveillance system and access control devices connect to the 24/7 Securitas Operation Center
- Highly trained security professionals remotely provide on-demand processing of individuals requesting access to your facility and authorize entry only to those with appropriate credentials
- Two-way audio allows for real-time interaction, verification and communication of key information and details
- Events are documented and auditable should the need arise
- Open platforms allow existing equipment to be utilized - often in combination with cutting-edge technology

## Partner Network Brings Together the Industry's Best

Securitas has global agreements with some of the security industry's top innovators, allowing us to deliver the best possible technology and services.

## Knowledge Leader in Security

Remote Guarding managed by Securitas provides state-of-the-art security in innovative and cost-effective packages. Cutting-edge cameras and software create real-time security that helps prevent incidents, optimizes security officers' time, and reduces costs.

More broadly, and for many of our clients, the best security solution is through Securitas Integrated Guarding, which delivers an optimal balance of On-site, Mobile and Remote Guarding, and Electronic Security. For each of our clients, we customize offerings that are best suited to their unique circumstances.

For more information on how Securitas can offer Remote Guarding and Integrated Guarding alternatives for your security program, please contact us at 844-470-8600 or visit [www.securitasinc.com](http://www.securitasinc.com)
