

Securitas Video Production Freelance Role

Securitas USA wants to produce several short (>3 minute) videos in January through March 2019. While we have typically used agencies for such work, we are looking for a freelancer who can capture and edit these videos in a quick turnaround at reasonable cost.

A typical project will involve:

- Discussing with our MarCom leads the targeted video concept and production intentions
- Coming to our Parsippany NJ HQs to capture the video content per a storyboard that we will develop
- Editing the video, including creative insertion of supporting pictures, text overlay, graphics, stock clips, etc.

Essential Requirements

- In-depth skills with Adobe Premiere Pro and After Effects, or equivalent
- Strong, hands-on experience in working with lighting and camera equipment
- Working-level knowledge in current video trends and storytelling techniques
- Creative capabilities a distinct plus
- Somewhat flexible schedule and ability to get to our Securitas HQs on an as needed basis

With most of our shoots occurring in North Jersey, we have a strong preference for a candidate in the local area. The initial engagement will be ~3 months. Assuming success, additional work will be offered throughout 2019.
